Journal of Applied Bioanalysis is a high-quality, peer-reviewed, international open-access journal solely dedicated to Bioanalysis.

The journal publishes original research, critical review papers and short papers in the exciting field of Bioanalysis.

The objective of the journal is to provide information of immediate relevance to Scientists working in Bioanalysis.

The primary scope of the journal covers any field of Bioanalysis applied in areas including pharmaceutical, biotechnology, clinical, environmental, medical, and omics sciences (i.e. genomics, transcriptomics, proteomics and metabolomics), and biopolymers research are welcome for submission.

For Aims and Scope, visit: betasciencepress-publishing.com/journals

Authors benefit from:

- APC discounts and waivers
- Timely publication - fast peer reviewing and publication times
- Rigorous double blind peer review on all articles
- Author friendly manuscript submission and tracking platform
- Global visibility

Now welcoming article submissions

The Journal of Bioanalysis (JAB) is a comprehensive source in the area of Bioanalysis. All bioanalytical techniques applied in bioassays ranging from immunoassays, chromatographic to electrophoretic separation applying various detection techniques are covered in the journal.

We welcome unsolicited article submissions that present significant scientific coverage of topics in any field of bioanalysis in areas including pharmaceutical, biotechnology, clinical, environmental, food, medical, Omics sciences (e.g. genomics, transcriptomics, proteomics and metabolomics) and biopolymer research.
